To whom it may concern:

Two years ago, McCree, Inc. designed and built a prototype tilt-up classroom with precast concrete walls for Orange County Public Schools and Edgewater High School. The model building at Edgewater has four classrooms in it. It was built for us in lieu of getting four portable classrooms.

The bottom line is that the "quads", as we call them, have been very well received by both teachers and students. The classrooms are sturdy, easy to keep clean, and wonderful educational settings for our students. I see this type of classroom as a very practical and satisfactory alternative to the traditional leased portables.

We found that the McCree company was very responsive to our needs as we prepared the rooms for our students and that they stood behind their product with wonderful support.

If I can be of further assistance, please do not hesitate to contact me.

Sincerely,

Michael R. Blasewitz
