Mr. Joe O. Robertson, P.E.
Vice President of Quality Control
McCree, Incorporated
500 E. Princeton Street
Orlando, FL 32803

Dear Mr. Robertson,

Thank you very much for the fabulous buildings McCree built at Bonneville Elementary. When the contract was awarded to your company, I was delighted. Now that the job is done, I have to say your company exceeded every expectation I ever had about the quality of the work. The work was done well, and on time.

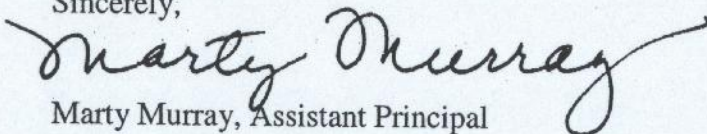

You need to know that Mike Garren, the supervisor of the job, is wonderful beyond description. He was clearly in charge of the job, and held the respect of all of the subcontractors and workers. He is not only a genuinely fine person, but he knows how to get work out of people and have them feel good about it. He skillfully directed the work of hundreds of people, and meshed them together so the trades were not stepping on each other's work.

I personally want him to know how much I appreciated him getting right to us when something had to be done that would inconvenience our folks, such as an cut water line. By knowing right away, we could alert our staff as to what they needed to do. Things were always promptly repaired, too.

We also appreciate the little touches, such as absolutely stunning wood doors, perfectly matched by grain when they were in pairs. The tile work is nicely done, and the shelving is beautiful. Even though we see the carpentry and painting, the unseen parts of the buildings are also appreciated, such as the site preparation, pouring of the slab, electrical, and air conditioning. The crew took extra steps to keep children safe at arrival and dismissal by controlling arrival of trucks and large volumes of deliveries.

I hope you will recognize Mike in some way for his outstanding leadership. I also hope you will be awarded additional contracts with the Orange County Public Schools. Your company builds good stuff, is cost effective, and on time.

Sincerely,

Marty Murray, Assistant Principal
